

Tires & Tubes

Tire Replacement

The tires that came on your CRF were designed to provide a good combination of handling, braking, durability, and comfort across a broad range of riding conditions.

▲ WARNING

Installing improper tires on your motorcycle can affect handling and stability. This can cause a crash in which you can be seriously hurt or killed.

Always use the size and type of tires recommended in this owner's manual.

Front	80/100-21 51M	
	DUNLOP	D742FA
Rear	110/100-18 64M	
	DUNLOP	D756
Type	bias-ply, tube type	

- When replacing, use the original equipment tires or equivalent tires of the same size, construction, speed rating, and load range as the originals.
- Replace the tube any time you replace a tire. The old tube will probably be stretched and, if installed in a new tire, could fail.
