

Finishing Touches

After washing your scooter, consider using a commercially-available spray cleaner/polish or quality liquid or paste wax to finish the job. Use only a non-abrasive polish or wax made specifically for motorcycles or automobiles. Apply the polish or wax according to the instructions on the container.

If a surface on your scooter is chipped or scratched, your Honda dealer has touch-up paint to match your scooter's colour. Be sure to use your scooter's colour code (page 92) when you buy touch-up paint.

Removing Road Salt

The salt contained in the road surface freezing prevention medicine which a road was sprayed with in winter, and the seawater becomes the cause which rust occurs in.

Wash your scooter by the following point after it runs through such a place.

1. Clean the scooter using cool water (page 128).

Do not use warm water.

This worsens the effect of the salt.

2. Dry the scooter and the surface of the metal is protected with the wax.
