
TA (Traffic Announcement Standby) Function

When the TA lever is up, “TA” will light on the display and the system will stand by for traffic announcements.

When a traffic information (TP) station is selected, “TP” will light on the display indicating that traffic reports can be received from this station. When the EON (Enhanced Other Network) TP station is selected, “TP” will also light on the display.

EON information cross-references other program services that broadcast traffic information, and when EON information is received, traffic reports can be received through another program service.

To turn off the TA function, up the TA lever again. “TA” will go out from the display.

Adjusting the Volume

The volume will be automatically adjusted while traffic information is broadcasted regardless of the VOLUME knob position. If you adjust the volume level, the new volume level for traffic information is temporarily stored in memory. The next time you listen to traffic information, the volume will be in the previous level. The minimum volume of traffic information is automatically adjusted to a predetermined level (VOL 10). If you adjust the volume level lower than VOL 10, it will automatically reset to VOL 10 when you receive
