

## **Loading**

- 1. Keep luggage weight low and close to the center of the motorcycle. Load weight equally on both sides to minimize imbalance. As weight is located farther from the motorcycle's center of gravity, handling is proportionally affected.**
- 2. All cargo must be secure for stable handling. Re-check cargo security frequently.**
- 3. Do not attach large or heavy items to the handlebars, front forks, or fender. Unstable handling or slow steering response may result.**
