

MODIFICATIONS

- * Modification of the FOUR TRAX, or removal of original equipment, may render the vehicle unsafe or illegal.
- * Spark arresters and mufflers are required in most areas. Don't modify your exhaust system. Remember that excessive noise bothers everyone and creates a bad image for off-road vehicles.

POST-RIDE CLEANING AND INSPECTION

To ensure safe handling and braking efficiency, thoroughly clean the entire vehicle after riding, and then carefully check the brake system, steering system, suspension system, tires and under side of the vehicle. Replace or repair any part that is damaged. Also, carefully inspect the exhaust system; replace or repair the exhaust system if necessary.

LOADING AND ACCESSORIES

WARNING

- * *To prevent an accident, use extreme care when riding with accessories and cargo. Addition of accessories and cargo can reduce the FOUR TRAX's stability, performance, and safe operating speed. Slow down (10 mph or less) when loaded with cargo or pulling a trailer.*

The combined weight of the rider, cargo, and all accessories must not exceed **170 kg (375 lbs)** which is the vehicle capacity load.

The following loading and towing capacity data is valid only when the riding terrain is level and flat. For different riding terrains, you must exercise your own judgement to load and ride the FOUR TRAX safely because carrying cargo can reduce the ability of the FOUR TRAX to operate on slopes or other rough terrain.

Never exceed the loading capacities given here.

1. Load cargo on the rear carrier as far forward as possible. Do not allow cargo to extend beyond the end of rear carrier.

Front carrier	20 kg (45 lbs)
Rear carrier	30 kg (66 lbs)
Storage compartment	1.35 kg (3 lbs)
