

ENGINE OIL AND FILTER

(Refer to Maintenance Precautions on page 58).

Engine Oil

Good engine oil has many desirable qualities. Use only high detergent, premium quality motor oil certified on the container to meet or exceed requirements for service SE or SF. It is not necessary to use additives.

Viscosity:

Viscosity grade of engine oil should be based on atmospheric temperatures in your riding area. The following provides a guide to the selection of the proper grade or viscosity of oil to be used at various atmospheric temperatures.
