

- (2) Set minutes and seconds to “58:00” with the UP/DOWN button. Pressing and holding the UP/DOWN button will change the meter reading continuously.

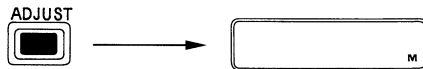

- (3) Two minutes before starting, lightly press the RESET-TIME button for less than 1 second.

- The elapsed time meter will be started or stopped each time the RESET-TIME button is pressed for less than 1 second.

- Pressing the ADJUST button will switch the meter from 60-minute to 24-hour operation, and vice versa. The mode indicator will display “M” when the meter is in 24-hour mode.

- Elapsed time meter function will continue even when the digital tripmeter is switched to CLOCK mode or when the ignition switch is turned OFF.
