

REAR BRAKE PEDAL HEIGHT

Check that the distance between the pedal and upper face of the footpeg is 9.5-10.5 mm ($\frac{3}{8}$ in).

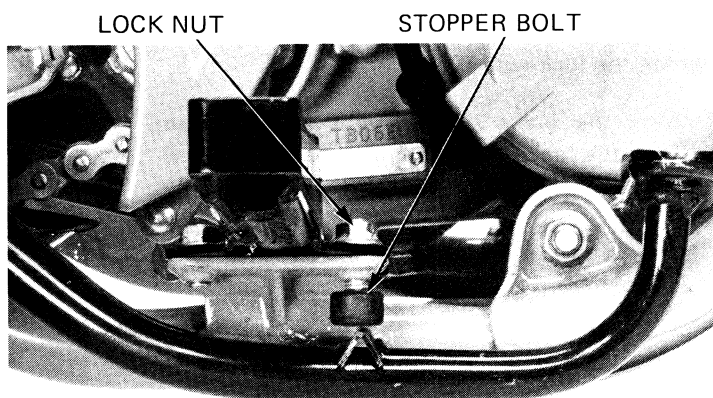

CAUTION:

Improper brake pedal height adjustment can cause brake drag.

ADJUSTMENT

Loosen the lock nut and screw the stopper bolt all the way in.

Loosen the lock nut on the brake adjuster. Turn the adjuster until the correct pedal height is obtained. Tighten the lock nut.
