

- To remove stubborn stains, use diluted detergent and rinse thoroughly with plenty of water.
- Avoid getting gasoline, brake fluid, or detergents on the instruments, windscreen, panels, or headlight.

Exhaust Pipe and Muffler

The exhaust is made of stainless steel, which can become tarnished with burn marks if splattered with oil or other substances when hot. To remove burn marks, use a mild abrasive compound. To remove dirt and mud, use a kitchen cleaning solution for stainless steel and wash with a soft sponge. Rinse with plenty of water to remove all residue.

When the exhaust pipe and muffler are painted, do not use a commercially available abrasive kitchen cleaning compound. Use a neutral detergent to clean the painted surface on the exhaust pipe and muffler. If you are not sure if your exhaust pipe and muffler are painted, contact your dealer.

NOTICE

Even though the exhaust is made of stainless steel, it can become stained. Remove all marks and blemishes as soon as they are noticed.
