

## Instruments *(Continued)*

- 2 Select the "DEFAULT" or one of the ten suspension damping levels using the **[SEL]** **▲** (up) or **[SEL]** **▼** (down) button.
- ▶ Press and hold the **[SEL]** **▲** (up) or **[SEL]** **▼** (down) button to move the menu quickly.
  - ▶ Available setting range:  
-5 to +5

SETTING		0 mph
SPORTS KIT	←	+3
EXIT	QUICKSHIFTER	+2
FUNCTION	SUSPENSION A1	DEFAULT
LAP TIME	SUSPENSION A2	-1
DISPLAY	SUSPENSION A3	-2
		-3

- 3 Press the **[MODE]** button. The selected item is set, and then the display returns to the upper level hierarchy.

## SUSPENSION M1, M2 and M3

**CBR1000S1/S2**

You can adjust the compression and rebound damping of the front and rear suspension electronically.

### Adjusting the ÖHLINS Smart EC system

➔ P.170

#### To end the setting

Select the **↩** (return) on the menu screen. The display returns to the "SUSPENSION M1", "SUSPENSION M2" or "SUSPENSION M3" menu on the "FUNCTION" screen.
