

# Riding mode

You can change the riding mode.

## Riding modes

### *Sport* mode

This mode gives throttle opening and power a feeling of linearity.

### *Sport+* mode

This mode offers stronger feeling of power than *Sport* mode.

### *Comfort* mode

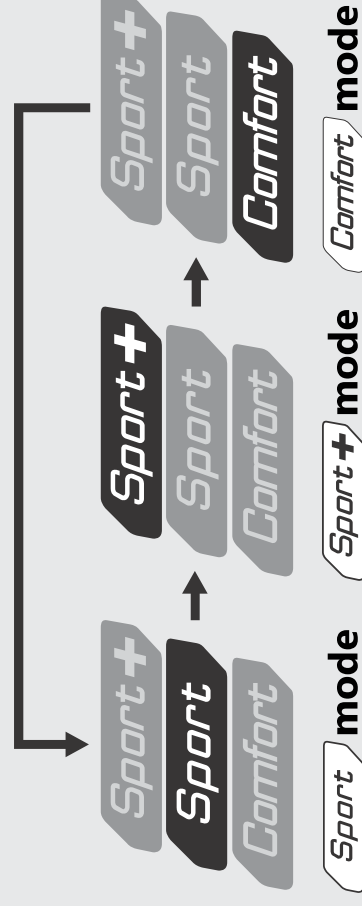

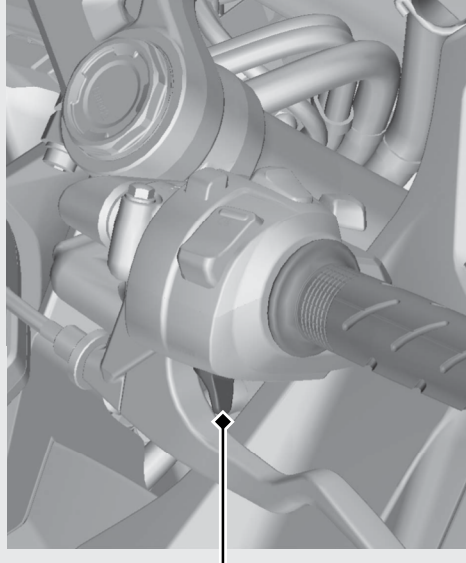

This mode emphasizes comfort with reduced power.

## Selecting the riding mode

Press the **MODE** button while the throttle is fully closed.

- ▶ If you press the **MODE** button while throttle is open, the riding mode does not change until throttle is fully closed. The riding mode indicator also blinks until the riding mode changed.
- ▶ Each time the ignition switch is turned to the ON position, the riding mode will automatically be set to *Sport* mode.

## **MODE** button

➔ Press the **MODE** button.
