

## Shifting Gears *(Continued)*

**AT MODE:** In this mode the gears are shifted automatically according to your riding conditions.

And also using the shift up switch (+) or shift down switch (-), you can temporarily shift up or down in AT MODE by using the shift switch. These switches are convenient when you want to temporarily down-shift in front of a curve, etc. 

You can choose between two modes within AT MODE: D mode and S mode.

**D mode (AT):** This is the standard mode when AT MODE is selected. Select D mode for regular operation and efficient fuel economy.

**S mode (AT):** Select this mode while riding in AT MODE when you need more power, such as when overtaking, climbing hills, pulling away.

S mode has three levels of adjustment.

**MT MODE:** MT MODE (6-speed manual operation) You can choose between 6 gears in this mode.
