• To decrease speed: push and hold the RES / + SET / - cruise control lever to SET / - side. The system will automatically slow your vehicle. When you reach the desired speed, release the RES / + SET / - cruise control lever. If the RES / + SET / - cruise control lever is pushed and held to SET / - side continuously, the set speed indicated in the multi-information display stops at the lower limit of the possible setting range.

To Manually Increase the Set Speed

- 1 Use the throttle to accelerate until you reach the desired speed.
- 2 Push and release the RES / + SET / cruise control lever to SET / - side.

To Manually Increase Vehicle Speed

- 1 Use the throttle in the normal manner to accelerate.
- 2 To return to the set speed, close the throttle and coast without applying the brakes. The cruise system will maintain the speed you previously set.

To Cancel Cruise Control To Disengage the System

• Press the cruise control main switch. (The cruise control main indicator goes off and the set speed will be erased from memory.)
