

Suspension

2. Check the security of all handlebar and fork mounting bolts (1). If any front suspension components appear worn or damaged, see your dealer for further inspection.

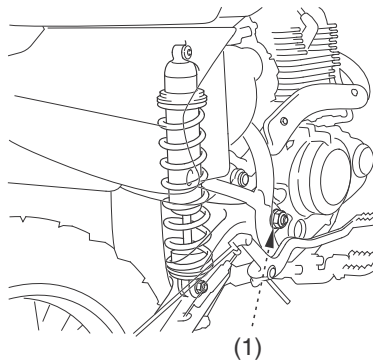

Rear Suspension Inspection

LEFT SIDE

- (1) swingarm bearing
- (2) shock absorber attachment points
- (3) suspension linkage attachment points

RIGHT SIDE

- (1) swingarm bearing

1. Place the motorcycle on a maintenance stand. Push hard against the side of the rear wheel and feel for any freeplay which indicates worn swingarm bearings (1).
