

I Cleaning and Lubricating

After inspecting the slack, clean the chain and sprockets while rotating the rear wheel. Use dry cloth with chain cleaner designed specifically for O-ring chains, or neutral detergent. Use a soft brush if the chain is dirty.

After cleaning, wipe dry and lubricate with the recommended lubricant. If not available, use SAE 80 or 90 gear oil.

Recommended lubricant:

Drive chain lubricant designed specifically for O-ring chains.

Do not use a steam cleaner, a high pressure cleaner, a wire brush, volatile solvent such as petrol and benzene, abrasive cleaner, chain cleaner or lubricant NOT designed specifically for O-ring chains as these can damage the rubber O-ring seals.

Avoid getting lubricant on the brakes or tyres. Avoid applying excess chain lubricant to prevent spray onto your clothes and the motorcycle.

Recommended Coolant

Pro Honda HP is a pre-mixed solution of antifreeze and distilled water.

Concentration:

50 % antifreeze and 50 % distilled water

A concentration of antifreeze below 40 % will not provide proper corrosion and cold temperature protection.
