

Audio Systems

SRS

SRS CS Auto™ creates a surround sound experience in the car and provides rich bass and an elevated audio image.

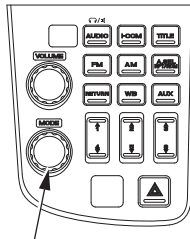

SRS Headphone™ creates a realistic and immersive 3D stereo headphone listening experience.

SRS and **Headphone** are trademarks of SRS Labs, Inc.

CS Auto and Headphone technologies are incorporated under license from SRS Labs, Inc.

- To use the circuit — push the MODE knob/button until “SRS CS Auto” is displayed (page 75). To select the SRS of headset, push the MODE knob/button until “SRS HP” is displayed. Then, within 5 seconds, change the SRS setting.
- To change the setting — turn the MODE knob/button. SRS CS Auto has three settings — HI, LO, OFF. SRS HP has two settings — ON, OFF.
