

Cleaning the Windscreen

Refer to *Safety Precautions* on page 122.

Using plenty of water, clean the windscreen with a soft cloth or sponge. (Avoid using detergents or any kind of chemical cleaner on the windscreen.) Dry with a soft, clean cloth.

NOTICE

To avoid possible scratching or other damage, use only water and a soft cloth or sponge to clean the windscreen.

For a dirtier windscreen, use a diluted neutral detergent with a sponge and plenty of water. Make sure to wash off all the detergent. (Detergent residue may cause windscreen cracks.)

Replace the windscreen if scratches cannot be removed and they obstruct clear vision.

Take care to keep battery electrolyte, brake fluid, or other chemical solvents off the windscreen and screen garnish. They will damage the plastic.

Cleaning the Display and Light Lens

Clean the display and light lens with a soft, damp cloth. You may use a mild cleaner intended for eyeglasses or computer displays. Harsher chemicals may damage the display and light lens.

NOTICE

To avoid possible scratching or other damage, use only water and a soft cloth or sponge to clean the display and light lens.

Take care to keep battery electrolyte, brake fluid, or other chemical solvents off the display and light lens. They will damage the display and light lens.
