

Suspensions *(continued)*

Rebound damping adjuster

Rebound damping:

Turning the rebound damping screw adjusts how quickly the shock absorber extends.

STD: 10 clicks from full hard.

Rebound damping
force

- When your Cota is new, your suspension will break-in as you ride.
- After break-in is completed, test ride your Cota with the rear suspension at the standard setting before attempting any adjustments.
- Make all rebound damping adjustment in one-click increments. Adjusting two or more clicks at a time may cause you to pass over the best adjustment. Test ride after each adjustment.
- If you become confused about adjustment settings, return to the standard position and start over.
