

Storing your motorcycle

If you store your motorcycle outdoors, you might want to consider using a full motorcycle cover.

If you are not going to use your motorcycle for a long period of time, follow these instructions:

- Wash your motorcycle and wax all painted surfaces (except matte painted surfaces). Apply rust preventing oil to all chrome parts.
- Lubricate the drive chain. 2 P. 45
- Place the motorcycle on a maintenance stand and on blocks so that both tyres are off the ground.

After taking the motorcycle out of storage, carry out all maintenance tasks included in the Maintenance schedule.
