- 6. Remove the battery from battery box.
- 7. Charge the battery (see the following section), unless you have been driving regularly.
- 8. Store your battery in an easy-to-reach location off the floor, in an area protected from freezing temperature and direct sunlight.
- 9. Clean the battery box after removing the battery for storage. Dry the battery box.
- 10. Slow charge the battery (see following section) once every 30 days.

Installation

1. Reinstall in the reverse order of removal. Be sure to connect the positive (+) terminal first, then the negative (—) terminal.
