**If you cannot start the engine:**
(1) Place the scooter on its center stand and lock the rear brake.
(2) With the throttle slightly opened (about 1/8 in (3 mm), without freeplay), press the start button or operate the kickstarter with a rapid and continuous motion.

About 1/8 in (3 mm), without freeplay

If Engine Will Not Start ➤P.85

If the engine does not start:
Using the start button
(1) Place the scooter on its center stand and lock the rear brake.
(2) Open the throttle fully and press the start button for 5 seconds.
(3) Follow the normal starting procedure.
(4) If the engine starts with unstable idle, open the throttle slightly.
(5) If the engine does not start, wait for 10 seconds, then follow stepss (1) - (3) again.

Using the kickstarter
(1) Turn the ignition switch to the OFF position.
(2) Open the throttle fully and crank the engine several times with the kickstarter.
(3) Turn the ignition switch to the ON position.
(4) Follow the normal starting procedure.
(5) If the engine starts with unstable idle, open the throttle slightly.
