

# Is Your Vehicle Ready to Drive?

---

- Seat Belts*      Make sure all seat belts are in good condition and operate properly. The seat belts must move smoothly when pulled out, and retract on their own when released.  
The latch plates should click securely into the buckles and release when the release buttons are pushed firmly.
- Side Nets*      Make sure all side nets and their mounting hardware are in good condition and that they latch and tighten securely.
- Exhaust System*      Make sure no materials or debris are sticking to, or accumulating around, the exhaust system. If any such debris is found, remove it so there's no chance for it to catch on fire. Start the engine and listen for any leaks.

## 3 CAUTION

Exhaust system and catalyst operate at very high temperatures.  
You can be burned if you touch the exhaust system or catalyst.  
Do not touch the exhaust system or catalyst without letting the system cool down.

## NOTICE

*Exhaust system and catalyst operate at very high temperatures. Accumulated debris and vegetation that contact the exhaust/ catalyst can catch on fire.  
Always conduct a pre-ride inspection and remove accumulated debris.*

Remember to take care of any problem you find or have your dealer correct it before you drive your Honda SXS.
