

Driving Guidelines

Your Honda SXS has been designed with many safety features to help protect you. These include a strong occupant protection structure, seat belts, doors, and side nets. However, no safety system can prevent all injuries.

The following pages contain important precautions and driving guidelines to help you make good decisions and operate your vehicle safely.

WARNING

Failure to follow the driving guidelines in this owner's manual can lead to a crash or overturn in which you or others can be seriously hurt or killed.

Follow all safe-driving guidelines in this owner's manual.

Safe Driving Precautions

Before driving your Honda SXS for the first time, please review the "Driver & Passenger Safety" section (page 1), the "Before Driving" section (page 53), and the precautions below.

We also recommend that you complete the Recreational Off-Highway Vehicle (ROV) E-Course. The free course is available at www.ROHVA.org. The two-hour ROV E-Course is a multi-media, interactive, online safety course that reinforces:

- Key risk factors associated with ROV operation
- Safe driving practices that will reduce risk of injury
- The best resources for learning about your particular vehicle
