

Riding in Reverse

NOTICE

Your ATV may be equipped with a reverse speed limiter, which helps the vehicle to maintain a safe speed while riding in reverse gear.

4. Make sure that the reverse indicator comes on and the gear position indicator shows "R".
5. Release the brakes.
6. Open the throttle gradually and ride slowly. Do not open the throttle suddenly or make abrupt turns.
7. To stop, close the throttle and gradually apply both the front and rear brakes. Do not abruptly apply the rear brake by itself.
8. Shift out of reverse and into "N" (neutral) or "1" (1st gear)
 - To shift into "N" (neutral), press the upshift switch (⬆) (3) once.
 - To shift into "1" (1st gear), press and hold the reverse switch (2), then press the upshift switch (⬆) (3) within 10 seconds.You can also shift into "1" (1st gear) by pressing and holding the upshift switch (⬆) (3), then pressing the reverse switch (2) within 0.5 seconds.

The reverse switch will not operate if you operate continuously with the reverse switch pressed.
Release the reverse switch once.

The transmission cannot be shifted from neutral back into reverse when the engine speed is above 3,100 rpm or speed of your ATV is above 3 mph (5 km/h).

3 WARNING

Applying only the rear brake abruptly when operating in reverse gear could cause the front wheels to lift off the ground and the ATV could overturn backwards.

Carefully apply both the front and rear brakes when stopping in reverse gear.
