## **Riding Your ATV**

## **Riding Through Water**

Your ATV is designed to travel through water up to approximately 10 inches (254 mm) deep. Before crossing a stream, make sure the water is not too deep or flowing too fast.

## **AWARNING**

The ATV tires have some ability to float. Operating this ATV through deep or fast-flowing water may cause a loss of traction and loss of control, which could lead to a crash.

Never operate this ATV in fast-flowing water or in water deeper than that specified in this owner's manual.

## **NOTICE**

Water entering the muffler may damage the oxygen sensor and result in emissions control system malfunction. Have your ATV dealer inspect the oxygen sensor immediately after water enters the muffler.
