

GPS Mode

A waypoint is a geographical position (location) on the surface of the Earth. GPSScape allows you to log up to 100 positions as navigational waypoints. You may then use GPSScape to show you the direction of any selected waypoint, and how far you are from that waypoint via straight-line travel.

You may mark such waypoints as home, base camp, your favorite riding, fishing, or hunting spots, as well as locations of wildlife sightings. Because you have 100 waypoints available, you may mark several intersections or landmarks as waypoints during a trail ride.
