

Safe Riding Precautions

Before riding your ATV for the first time, please review the *ATV Safety* section beginning on page 1, and the *Before Riding* section beginning on page 29.

Even if you have ridden other ATVs, take time to become familiar with how this ATV works and handles. Practice in a safe area until you build your skills and get accustomed to the ATV's size and weight.

Your ATV is not equipped with lights. Do not ride at night.

Speed Restrictors for New Riders

To limit top speed to about one half of normal in every gear, your ATV has an adjustable throttle limiter and air intake restrictor.

The screw and lock nut in the lower throttle housing can be adjusted to limit throttle lever movement. The air intake restrictor is used to restrict air flow to the engine, which reduces engine power.
